www.sebster.dev

London-based front-end developer with full-stack experience, passion for problem-solving, and an ongoing desire to learn. Self-motivated, curious about new technologies, diligent with code quality, performance, and standards-compliance. Looking for a fully remote front-end developer position (perm or contract).

Technical Skills

- Main Skills** JavaScript, TypeScript, React 18, Next.js 14, CSS (Tailwind, Sass, BEM), HTML5, PWA, TDD, Architecting and building scalable, responsive, accessible web applications
- Familiar with** Node, Express, Mongo, REST APIs, JSON, GraphQL, Firebase, Web3, CI/CD, Docker, MSAL, JWT, Jest, Testing Library, Playwright, Cypress, Nightwatch, Storybook, Styled-components, JSS, Material UI, Bootstrap, Gatsby, Angular, jQuery, Github, Bitbucket, Vercel, Wordpress
- Dev Tools** VSCode, VisualStudio, DevTools, Webpack, Gulp, Postman, Git, CLI, Lighthouse, aXe, Snyk
- Design Tools** Figma, Adobe XD, Photoshop, Illustrator, CorelDRAW, CorelPhotopaint, GIMP, Gravit

Relevant Experience

07.2023 - 02.2024 **Senior Front-end Developer** - [TT Education](#), school-management software Colchester, UK

- Led the modernization of the platform: reimplemented key features (e.g. auth, API, checkout), enabling further development and enhancing stability, performance, and UX. Added accessibility and a full testing suite
- Implemented cross-product auth (MSAL-based), enabling incremental replacement of legacy systems
- Developed the interface for the AI chat feature and created a new design system

10.2021 - 02.2023 **Software Developer (contract)** - [eBit labs](#), a blockchain analytics startup London, UK

- Principal front-end developer (1st front-end dev in the team)
- Architected and built [tokensite.com](#) with Web3 integration, custom component library, CI/CD workflow
- Lead and mentored junior developers

11.2020 - 10.2021 **Front-end developer** - [AO.com](#), a major e-commerce platform Bolton, UK

- Sole front-end developer in the Payments Team - integrated & maintained payment and finance services
- Architected, built, and maintained a centralised payment system distributed across teams as a micro frontend, replacing legacy systems and streamlining the process of integrating new payment providers
- Maintained the finance application website section; reduced errors saving the company £16k a month

11.2017 - 11.2020 **Web developer & designer** - freelance, part-time London, UK

- [Animalysis](#) - Sole developer
 - Built a full-stack progressive web app that streamlines the process of reporting pet health problems to vet clinics by means of a dynamically generated, personalised survey
 - Built a vet clinic management system for searching reports history and survey customization
 - Used cloud platforms (Heroku, Atlas, Cloudinary) to optimise performance and minimise server load
- [Narbon Fashion Store](#) - Sole developer
 - Built a modern e-commerce progressive web app using React, Redux, and Node
 - Implemented Firebase user authentication and database, and Stripe payments
- *Numerous small-business brochure websites, ecommerce, and design work (available upon request)*
